Provided**

Tech Presentation on Introduction to the Internet of Things (IoT)

Speaker: Dr. David Liu

**Associate Professor of Computer Science, Indiana University-Purdue University
Fort Wayne**

Abstract

Industry predicts the number of smart objects will be counted in billions within the next ten years. Internet of Things (smart objects) will interconnect the digital world with the physical world. In this talk, Internet of Things (IoT) is introduced. The key enabling technologies and application domains are discussed. We conclude the talk with opportunities, open research challenges and future directions with the development of Internet of Things.
